

SPECIALIST FABRICATORS - ARCHITECTURAL METALWORKERS - DESIGN & INSTALLATION ENGINEERS

Project -	TONBRIDGE
Employer -	GLAXO SMITH KLINE
Principal Contractor -	AMEC
Contract Value	£197,000
Date	Aug 2004 - Feb 2005

The project involved the design development from details provided for the manufacture and installation of an external spiral fire escape stair and feature pod detail to a new laboratory complex.

The design was completed for sectional completion within the workshop for ease of site assembly - the design theme was continued for an internal main stair and balustrade of the laboratory floor and 'write-up' area.
