

**SPECIALIST FABRICATORS - ARCHITECTURAL METALWORKERS - DESIGN & INSTALLATION ENGINEERS**

Project -	WATERLOO EAST STATION
Employer -	RAILTRACK PLC
Principal Contractor -	M.J.GLEESON GROUP PLC
Contract Value -	£502,000
Date -	Sept 2000 - July 2001

With a combination of both normal working hours and possessions, McNealy Brown Limited removed the existing timber framed enclosures to three ramps and two over bridges.

Comprehensive welding repairs were carried out to the wrought iron structure of the over-bridges.

A new rolled hollow section framework was manufactured at our Sittingbourne works and installed to form a new sub-structure supporting a composite roof system, internal claddings complete with sills, purpose made rain water goods and fully rotational windows for easy maintenance.

All works were carried out in house by McNealy Brown Limited.
